

Name: Nitin Madas

Roll No: A036

Sap. Id: 86062300054

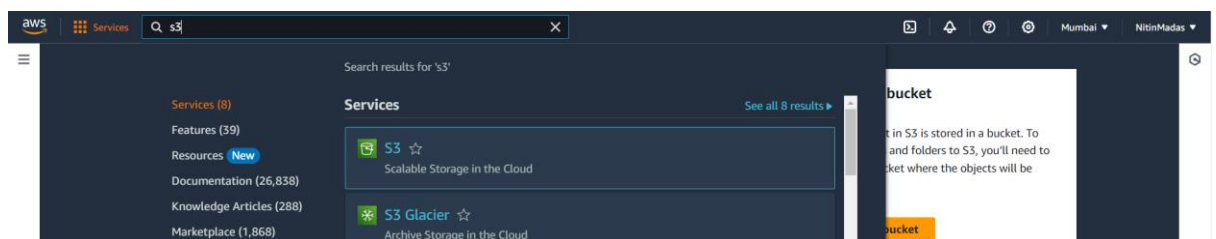

MSc SDS Batch 1

Cloud Computing Practical 2

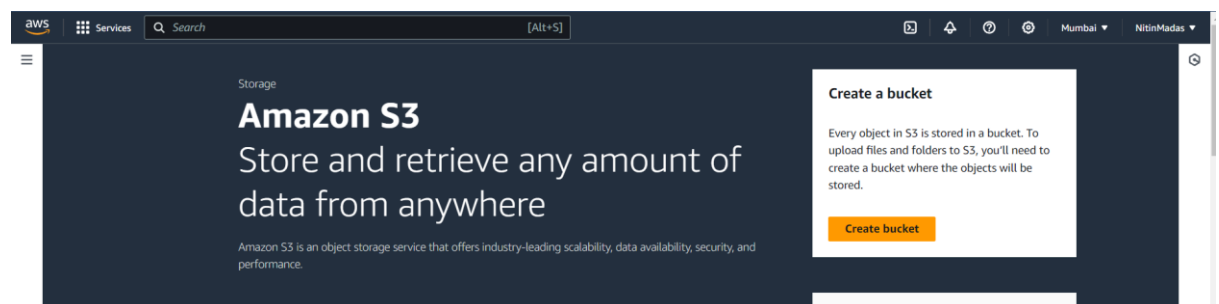

1) Uploading a file, video, etc

Steps:

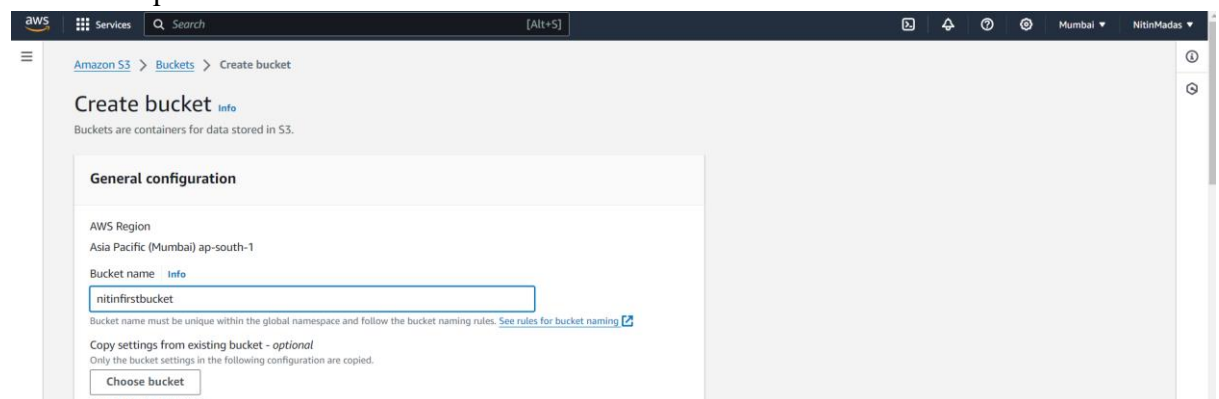

1. Open Amazon Web Services (AWS) and login in the services.
2. In the search tab search S3 and select it.

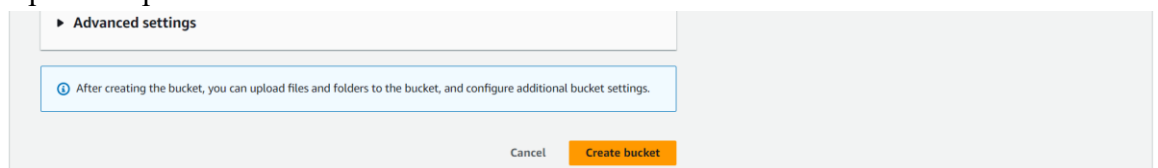

3. Click on create bucket

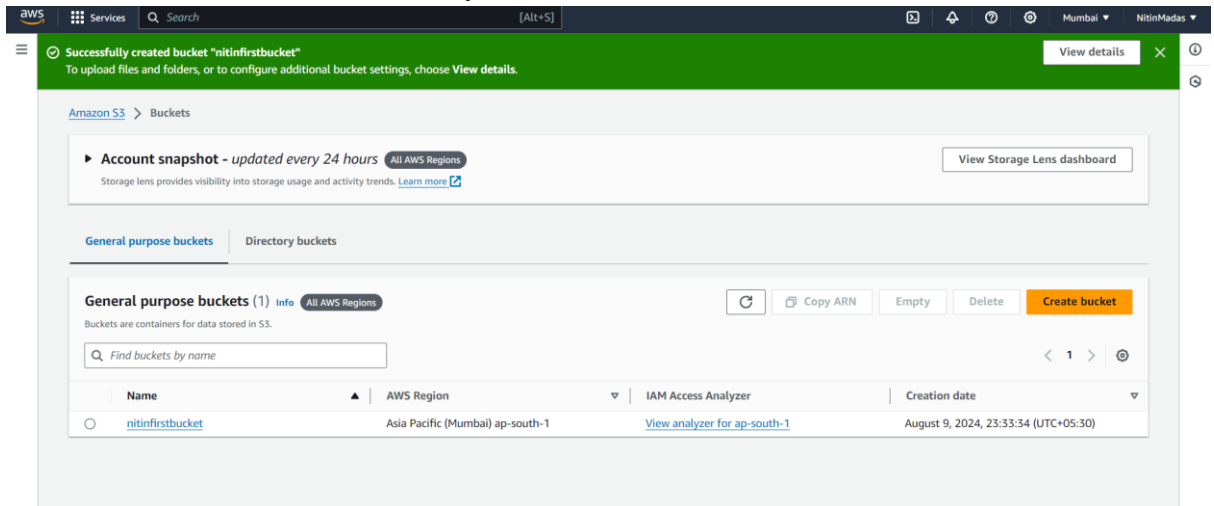

4. Give a unique name to the bucket

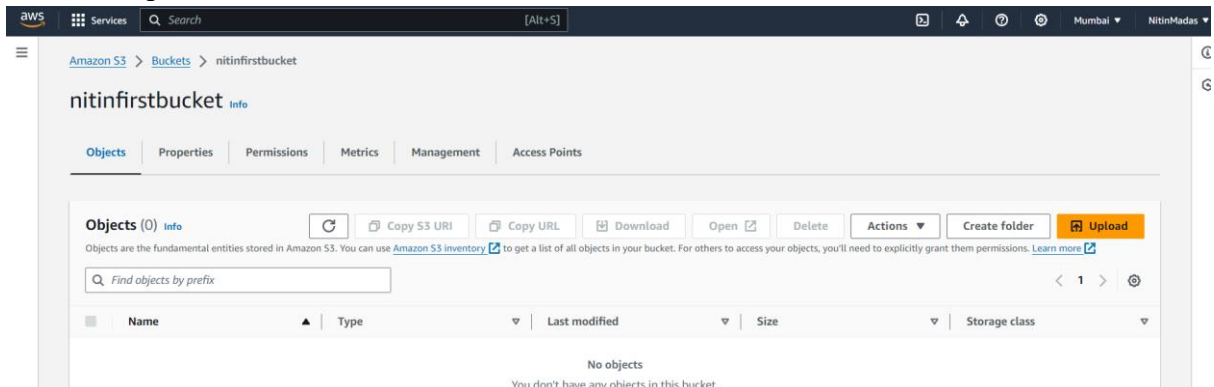

5. Keep other options default and click on create bucket

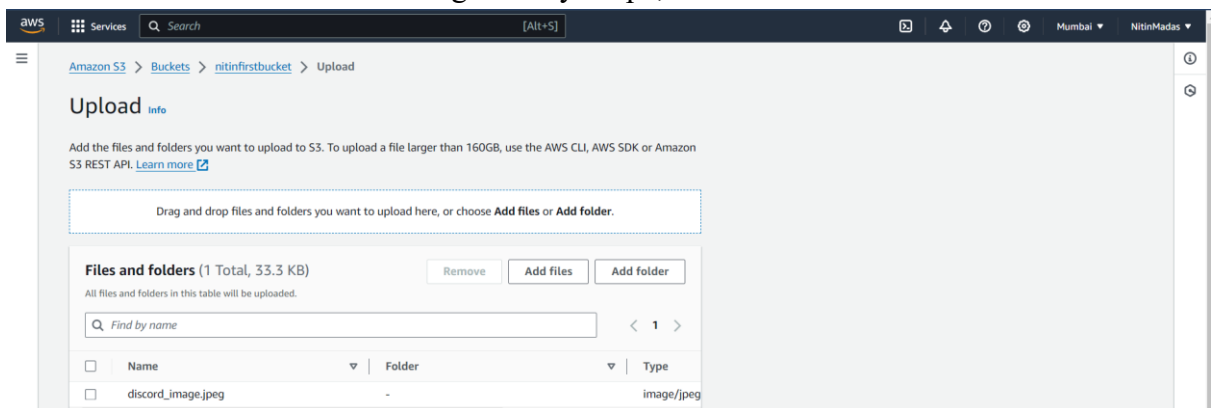

6. Bucket has been created successfully, now click on name of the bucket

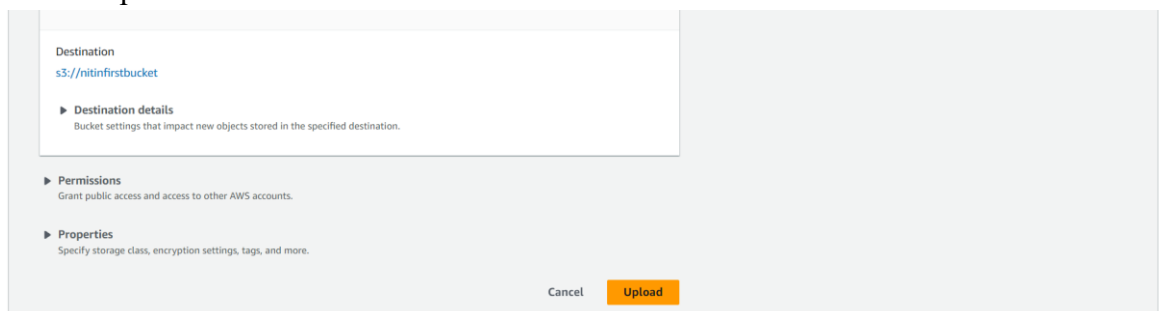

7. Click on Upload.

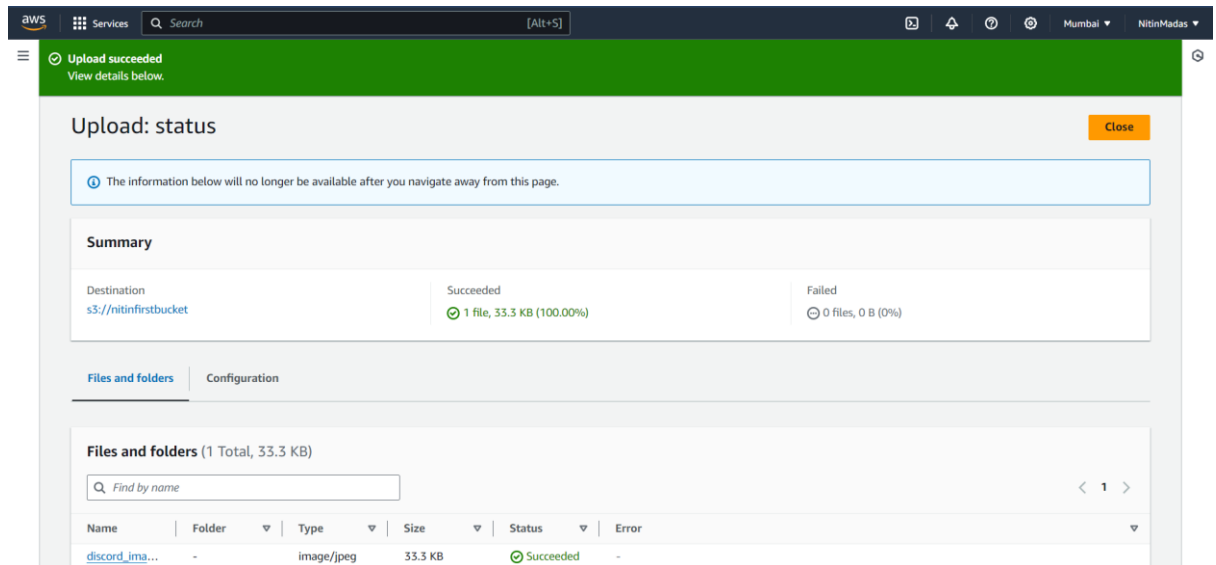

8. Click on Add files and add the image from your pc,

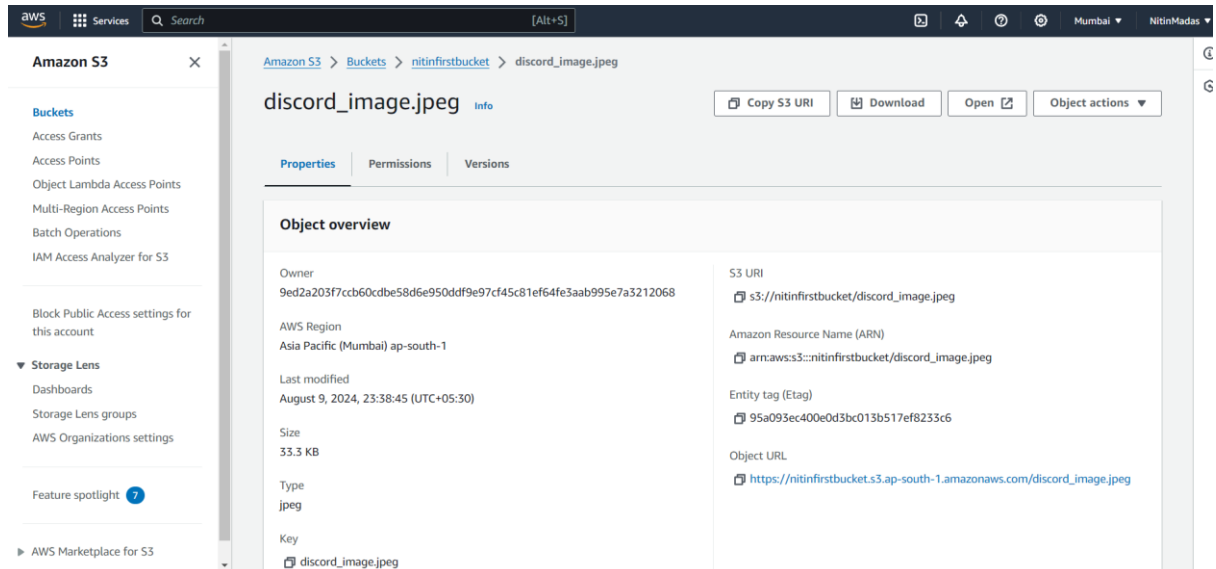

9. Click on Upload button.

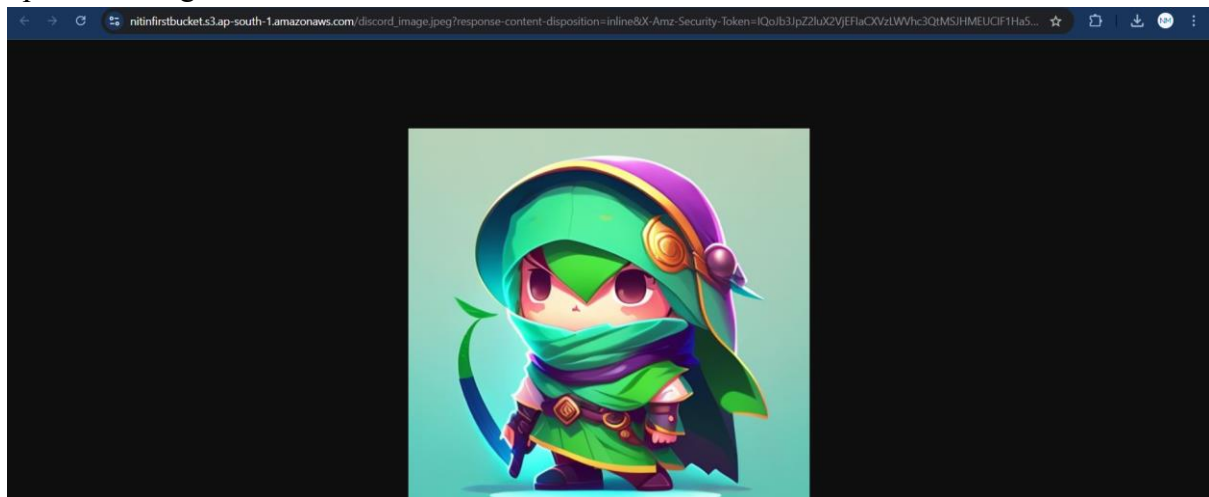

10. Uploaded Successfully, check your image click on the link inside the Name of the Files and Folders.

11. Click on the open button then you will get the uploaded image.

uploaded image

2) Uploading a static website:

1. Click on Create other bucket for creating another bucket for creating an html webpage that will open in the AWS. Proceed with same process mentioned above
